

Start toward a new money-making career!

Your Future as a High School Graduate

If you left high school before graduating, you have probably already found out how difficult your working life can be. The lack of a high school diploma seriously limits work opportunities. According to the United States Department of Labor, people with a high school diploma earn an average of \$9,000 more per year than those who lack a high school diploma*. Fortunately, Stratford's High School Diploma Program can be your key to success.

Thousands of students have successfully earned high school diplomas after having dropped out. Now you can too!

Not only can you attain this goal, but you may find it easier than you expect. You study at home, in your spare time, and at your own pace. Everything is laid out for you step-by-step, and if you have any questions, instructors are just a toll-free phone call away. There is no pressure, no deadlines, no scrambling to make up missed classes, and no cramming for examinations. In fact, many students obtain much better results through the home study method than they did in the classroom.

Don't let the past influence what you can accomplish today. With a bit of determination you could be on your way to earning your Stratford diploma.

High school graduates must possess a well-rounded knowledge in several subject areas. Your Stratford program is structured in a format that is similar to most

schools. Stratford's quality textbooks are written by professional educators who are specialists in their fields.

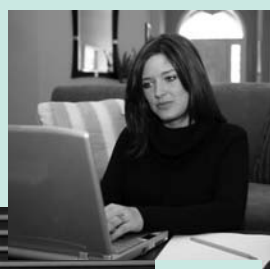

Beginning with Social Studies, and continuing through English, History, Mathematics, American Government and Science, this program will provide the proper level of knowledge that will benefit you on countless occasions throughout your life.

In each subject area, practical applications are emphasized. For example, the English module improves your grammar and sentence structure. It also includes guidance on how to write the type of resume that will land you that job and the type of reports employers will expect after you're hired. The Math module reviews the basics, but it also provides valuable information about managing money, retailing, banking, and other career applications.

From start to finish, our program designers have kept in mind the needs of mature, career-oriented students. Your time is valuable, and we get you where you need to be on as straight forward a path as possible. Take your first step down this path by sending us the enclosed enrollment agreement today!
